

Shiel Internal

Fully supported custom roof flashings designed to cover the internal junction of the two roof slopes along the ridge line of the building roof. They ensure waterproofing and provide a clean, finished appearance in roofing systems constructed with ThermaBarr, ThermaGard and ThermaMagma COV insulated panels or with MetaLite COV single-skin metal sheets of any profile

Available in

Side dimension 200mm | Length 3m

Configuration

Suitable for application on any profile

Installation

They are fixed to the supporting structure using the standard visible fixing method
