

SkyLite COV 39/128

Self-supporting translucent polyester sheets with a 39/128 trapezoidal profile, suitable for creating natural daylighting zones or for roofing applications on all types of buildings

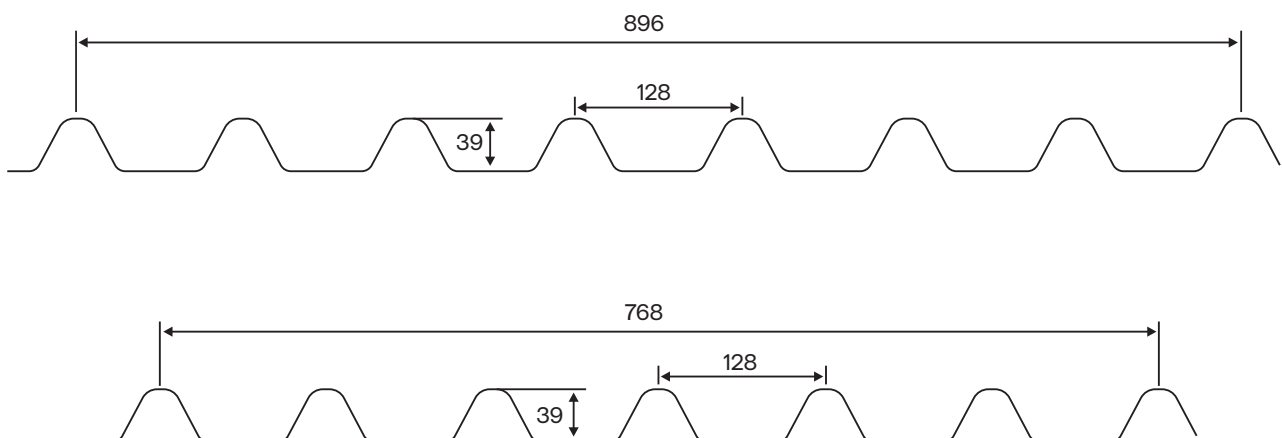

Available in

Effective cover width 768mm and 896mm

Standard lengths up to 7m, depending on project requirements

39/128 trapezoidal profile

- It is compatible with trapezoidal metal sheets with a profile height of 39 mm and a pitch of 128 mm. Thanks to its dense ribbing, it offers excellent resistance to bending loads.
- Its side joint is designed to fit perfectly with trapezoidal metal sheets, ensuring excellent watertightness.
- It allows natural daylight to enter interior spaces, reducing the need for artificial lighting and improving the building's energy efficiency.
- It is available with MELINEX 301 protective film for enhanced protection against sunlight, UV radiation, acids and adverse weather conditions.

Technical Specifications

Specific weight	1,30 – 1,40 gr/cm3
Light transmittance	85%
Operating temperature range	-40o+120o C
Expansion	9 – 25 x 10 – 6 mm/oC
Absorption	0,18 – 0,25 % mg/oC
Hardness	40 Barcol
Flash point	404,4 oC
Thermal conductivity coefficient (λ)	0,26 (W/mk)
